Professional Summary:

Full Stack Web Developer with a strong academic background in HTML, CSS, Javascript, Node.js and React.js after completing a Coding Bootcamp with Monash University.

Having been a successful Podiatrist for the past five years, the key skills that align with Web Development include problem solving, teamwork and relationship building.

Eager to further develop these skills and tackle challenges through a career in Web Development with a positive mindset and willingness to learn. Have also acquired the ability to be innovative and have attention to detail through a number of Web Development projects.

Education:

2020	Monash University Coding Bootcamp Monash University & Trilogy Education
2011 - 2015	Bachelor of Health Sciences and Master of Podiatric Practice La Trobe University
2005 - 2010	Secondary education and VCE Glen Waverley Secondary College

Skills and Attributes:

- **Problem Solving:**

A career in podiatry has allowed this area to strengthen while diagnosing and formulating treatment plans for patients through utilising a solution oriented mindset.

As a web developer, completing projects has further developed problem solving skills while overcoming any obstacles faced.

- **Work within a team:**

As a podiatrist, working within a multidisciplinary team and other podiatrists to express ideas as well as appreciating input from other team members to achieve the team goal.

As a web developer, working within a team of other web developers by sharing ideas and work load to build group projects.

- **Relationship building:**

To build confidence with patients and the team through providing insightful professional advice.

As a web developer taking part in group projects, was able to develop a productive relationship with team members.

- **Attention to Detail:**

Write clean and well commented code. Demonstrated during several individual and group projects where all functional requirements were met, and was easily integrated with other developer's code.

- **Innovation:**

Enjoy focusing on creativity to build websites with aesthetic user interfaces. This is demonstrated in project repositories within the above GitHub profile.

- **HTML, CSS, Javascript, JQuery, Node.js, React.js, Express.js, MySQL, MongoDB:**

Have taken part in individual and group projects to create CLI and web applications with different functionalities implementing technologies. These are demonstrated within the GitHub profile linked above.

- **Git:**

Collaborated with a team during group projects utilising Git.

Experience:

July 2017-Current

Podiatrist - *TLC Health Care*

April 2016 - July 2017

Podiatrist - *Stawell Regional Health*

April 2016 - July 2017
